A FINE FIELD FOR WORKINGMEN.-Under this heading the New York Herald says the South, from Virginia, yea from Maryland to Texas, is a fine field for workingmen at this time, when in all branches of labor and trade in the North the supply of workingmen so far exceeds the demand that many thousands of willing hands are out of employment. "The South," says the Herald, "invites them to deme on," we have room enough, and work enough. and land and bread enough for all. Why cannot societies, then, be formed in the cities and towns of the North, where labor is in excess of the demand, for the purpose of providing work and homes for these unemployed, able-bodied men in the South? We would call the attention of all concerned to this important subject." The Herald is right. The South offers a field in which capital and industry can find a remunerative return, and to which the honest settler, from whatever State or country he may come, will be welcome.

GEN. BUTLER'S DISABILITY BILL.—The bill which Gen. Butter reported from the Reconstruction Committee on Thursday, is not the kind that is wanted. It makes the conditions which a person must fill before receiving his parden, too embar-rassing and humiliating. It arranges for public notice to be given of the intention of each one to apply before the courts for a removal of disabilities, and thus a sort of interest is given to each occasion, and the recital of a penitent's "acts done against the Government" is heard by hundreds of persans who have done the same thing, and an esprit is excited which is more apt to revive old rebel jubilation than to reclaim old rebel

What we want is something broad and statesmanlike, something that is universal, which excepts nobody, imposes no tions, with instructions to incorporate conditions and asks no retractions, but the whole in one bill. which simply says: "We forgive you; go and sin no more." There is nothing to do but to issue a general bill under the clause of the fourteenth amendment, providing that two-thirds of each house of Congress may relieve personal disa-bilities. The mode is so simple, that if Gen. Butler goes to work in the right way, he can dispose of it more easily than he did of Cox.

JUST AS WE EXPECTED —Chief Constable Hubbard, in reply to Dr. Doyle's resolution requiring him to furnish the names of persons murdered in the various Counties, states to the Legislature that he is unable to do so, from the fact that his subordinates only reported the number of murders, and not the names of the murdered. This functionary reported five murders in Oconee County— just five more than occurred. Such is the reliability of the Governor's Chief of Police! - Keowee Courier.

A terrific boiler explosion occurred at 513 and 515 West Twenty-third street, New York, on the 14th. Two three-story brick buildings were completely destroyed. The total loss is \$30,000. The engineer, fireman and book-keeper were danger-onsly scalded. The boiler shot into the air, and, descending, crushed through the roof of an adjoining building, which, however, was little damaged.

MYSTERIOUS MURDER IN SAVANNAH. The Savannah Advertiser reports the murder, in that city, of a negro named Borsey Fields or Paul Bryan, hailing from Purysburg, South Carolina. He was cut with a long, sharp knife, and beat on the head with some dull weapon. His assailants are not known.

SOMETHING NEW UNDER THE SUN. - We had the gratification yesterday morning, of examining the model of a machine of examining the model of a machine which is destined, we verily believe, to make a revolution in street railroading. This improvement is the invention of Mr. J. R. Glenn, of New York. In its working, it reversed all former rules, the rails running on the wheels rather than the wheels on the rails. As such, the invention was named the "Portable Railway." During two years past, Mr. Glenn has been perfecting his car and applying the principles to other materials. As in the way: W. J. Cohen, Josiah Sibley, Augusta; E. O. Humphreys and lady, Miss M. Priest, Michiphreys and lady, Miss M. Priest, Mich spplying the principles to other machines, such as dredges, elevators, and paddle wheels. It would, perhaps, be as well for the parties interested in our contemplated street railroad line to examine this model, which may be seen at this office, for a day or two.

WORTH GOING TO SEE .- The Nickerson House Hall will likely be visited by a large number of our citizens to-daythe Panorama of New York city exhibits there at 3 and 8 o'clock for the last times in Columbia. Yesterday afternoon, and getting aboard the cars and taking fortyfive hours to reach the reality-and then, after the tiresome ride, we wouldn't have the statistics. The price of admission is so low that nearly everybody may go to see the panorama. It is especially interesting and instructive to the children, and every little girl and boy in the city who visits it will be benefitted by what is seen and heard.
